Hi Light Features of Package 12

Honeywell LYNXRIEN

With its uncompromising technology and reliability, the new LYNXRIEN is as easy to install as it is to use. The exciting new voice prompt programming feature walks you through the installation process, letting you install the system with little or no training. Designed for a quick install, LYNXRIEN-EA is a control panel, keypad, siren, dialer, two-way voice system and speakerphone in one sleek unit. It supports all 5800 wireless devices and sensors.

Features

- Voice prompt programming mode
- 24 wireless zones of protection and one hardwired zone
- Can accept four wireless keys that don't require zones
- Full 16-button keypad with easy-to-read LCD display and status LEDs
- Built-in two-way voice system
- Wall or optional desk-top mounting
- 85db internal sounder with voice siren
- Internal speaker and microphone
- 16 user codes
- 84 event log (Fully downloadable)
- Scheduling
- Voice siren
- Full voice response
- Family message center that records and plays back voice messages
- Remote interactive phone control
- Bi-directional remote provides system status feedback
- Wireless, programmable remotes offer single-button system control
- Chime by zone feature sounds chime and speaks location in plain English

Honeywell Wireless Rate-of-Rise & Fixed Temperature Heat Detector

Honeywell wireless rate-of-rise temperature & fixed temperature heat detector offers expanded fire detection and installation flexibility. It is ideal for hard to wire locations. With no wires to run, it is fast and easy to install. It combines both rate-of-rise and fixed temperature sensors. Fires typically cause a rapid rise in temperature in the surrounding area. The detector's rate-of-rise thermostat senses the rise in temperature and signals an alarm if the increase is 8 c or more per minute. A built-in fixed temperature sensor will also signal an alarm if the environmental temperature rises above 57 c.

Honeywell wireless two-zone door/window transmitter

Two zone transmitter with (1) built-in magnetic reed switches and (2) wired closed circuit contact loop
The second transmitter (wired closed circuit contact loop) can be used to transmit the Optex PIR detector signal.
